

Clarisonic PRO sonic cleansing with Body Brush Head improves skin texture

Study Objective:

To evaluate the effectiveness of the Clarisonic PRO sonic cleansing with Body Brush Head when used on areas of the body requiring extra attention and care

Methodology:

- 55 women participated in a 4-week home use test to evaluate the Clarisonic PRO sonic cleansing with Body Brush Head
- Subjects used a body cleanser of their choice with the Body Brush Head for the duration of the study
- Subjects were instructed to use the Body Brush Head on areas of the body requiring extra attention/care and to use the Clarisonic PRO sonic cleansing as long as they felt was necessary
- Subjects were informed that the Body Brush Head was not intended for total body cleansing or facial cleansing

Results:

After 4 weeks of use, 85% of subjects noticed an improvement in the texture of the skin after using Clarisonic sonic cleansing with Body Brush Head

Subjects found the Body Brush Head beneficial in cleansing areas of the body needing special attention and care

96% of subjects reported softer, smoother skin

Improvement in Skin Texture
